

Trend Micro™ **SafeSync for Business**

Securely manage, share, and access your company data online

Trend Micro™ SafeSync™ for Business is all you need to easily and securely manage, share, and access your company's digital files from anywhere at anytime via a web browser or even a mobile device. It redefines online file storage management, allowing you to eliminate on-premise data storage equipment.

With SafeSync, your business files from multiple devices are automatically synchronized and secured with an additional, up-to-date copy of all files held in the cloud. Your data is accessible at anytime with a web browser, allowing you to share it among co-workers, clients, and partners anywhere.

Developed by Trend Micro - a cloud security leader with 20+ years experience of keeping data safe - SafeSync for Business requires no technical skill to setup and use. It keeps and restores your files, so that in the event of a disaster, accident, or theft, you don't lose valuable data, time, or business.

KEY BENEFITS

SafeSync for Business is a simple but strong online file management and backup solution that:

- Enables you to manage all your business data / files securely online
- Replaces existing (costly) file and backup server solutions
- Provides all the storage capacity and functionalities to manage your business data
- Automatically backs up your data to a secure state-of-the-art data center
- Synchronizes your devices automatically when you save or make a change to your data
- Grows with your business by offering each employee their own log in
- Enables groups of users to create virtual shared folders for team collaboration
- Allows easy access to your business files anytime via a web browser or even a smartphone, removing the need for expensive and complex VPN solutions
- Gives you peace of mind knowing in the event of a disaster or theft you have instant access to backup copies of your data

**SafeSync**TM
for **Business**

System Memory
<ul style="list-style-type: none"> • 1GB for Windows 7/Vista, Mac OSX; 512MB for Windows XP (1GB recommended)

SECURITY

Confidentiality

Data center operated by Trend Micro, no one has access to data on server

24/7 surveillance

Access to the cabinets and servers is biometrically controlled and always under surveillance

Encryption

Data is transferred between you and SafeSync service using the same AES 256-bit encryption used by financial institutions

Remote access control

You have the ability to share or revoke access to your shared files at any time

Network and server security

Our system uses an industry best practice secure permission structure to safeguard file access, all hosted in our state-of-the-art data center

Firewalls

Defends equipment from cyber attack with multiple firewalls

Load balancers

Ensures constant availability of online backup and file restoration, even in the event of equipment failure

Redundant server and Internet connections

Two copies of data are stored on two separate servers plus two separate service providers connecting the data centre ensuring availability of data

20+ years of experience

Trend Micro has more than two decades of experience keeping data safe for consumers, small businesses, government agencies, and large enterprises

Compliance with data protection standards

Data centers are SAS 70 Type 2 certified

Antivirus on servers

All data center servers scan files for malware
